

# Build a Space Shuttle and Suit

**HELP** - Color and cut out pieces.  
- Glue the pieces onto the matching spaces.

**EXTERNAL TANK:**

Gives the fuel needed for the shuttle to leave the earth, it falls off and isn't recovered.

**ROCKET BOOSTER:**

Gives the first boost and then falls off, is recovered and used again

**TILES:**

These heat resistance tiles protect the shuttle against extreme heat and cold

**FLIGHT DECK:**

Where the pilot sits and has the controls to fly the shuttle

**PAYLOAD BAY:**

Cargo is stored here and the doors are opened once in orbit to help cool the shuttle

**FUEL TANKS**

**MAIN ENGINES:**

Helps power the shuttle
