

# Coin Experiments

## Directions

- Give your child a magnify glass and let them explore and experiment with the coins,
- Try stacking, lining up to make letters, spinning the coins, or dropping into different containers.
- Show your child how to flip a coin. On the worksheet, color the matching side that the coin lands.
- In the magnify glass picture, have your child match the circles sizes with the coins.
- In the bottom left-hand square, put four coins in the top circles and have your child match them in the bottom circles.

## Materials

2 of each:

quarter, penny, nickel, dime  
magnify glass
