

# Fall Five Senses

- Let your child color the pieces, then cut out on the dashed lines.
- Explain to your child that we have amazing bodies with five senses that help us get information about the world around us. During autumn time we can see, hear, taste, touch, and smell many wonderful things.
- Put the pictures in a bag and let your child pick a picture out. Go on a hunt to find things using that sense.
- For fun, have your child draw pictures of what he finds or help him write words, then display what you find.
