

# Moon Trading Cards

**CHILD** - Color and cut out the cards.  
- Have fun learning about the different moons.

A trading card for the Moon of Earth. It features a circular moon with a smiling face and several craters of varying sizes. To the right of the moon is a speech bubble containing the word "MOON". Below the speech bubble is a star icon. To the right of the star is a vertical label that says "TEAM PLANET EARTH".

Since it is the first moon ever seen, it gets the honor of being called, "The Moon"

A trading card for Europa of Jupiter. It features a circular moon with a cracked, icy surface and a smiling face. To the right of the moon is a speech bubble containing the word "EUROPA". Below the speech bubble is a star icon. To the right of the star is a vertical label that says "TEAM PLANET JUPITER".

It is covered in a thick layer of ice and there might be an ocean underneath where life could exist

A trading card for Phobos of Mars. It features an irregularly shaped moon with a smiling face and several craters. To the right of the moon is a speech bubble containing the word "PHOBOS". Below the speech bubble is a star icon. To the right of the star is a vertical label that says "TEAM PLANET MARS".

It is a lumpy, cratered moon that orbits closer to its planet than any other moon

A trading card for Io of Jupiter. It features a circular moon with a smiling face and several volcanoes. To the right of the moon is a speech bubble containing the word "IO". Below the speech bubble is a star icon. To the right of the star is a vertical label that says "TEAM PLANET JUPITER".

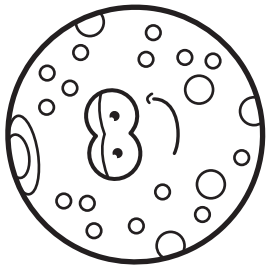

It has the most active volcanoes in the solar system and its surface kind of looks like a pizza

A trading card for Callisto of Jupiter. It features a circular moon with a smiling face and a surface covered in many small craters. To the right of the moon is a speech bubble containing the word "CALLISTO". Below the speech bubble is a star icon. To the right of the star is a vertical label that says "TEAM PLANET JUPITER".

It has the most craters of any object in the solar system and has the oldest surface

A trading card for Ganymede of Jupiter. It features a circular moon with a smiling face and a surface with various features, including craters and a large dark region. To the right of the moon is a speech bubble containing the word "GANYMEDE". Below the speech bubble is a star icon. To the right of the star is a vertical label that says "TEAM PLANET JUPITER".

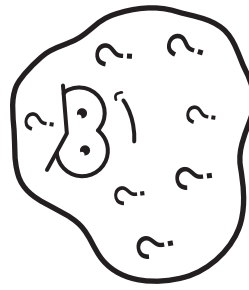

It is the largest moon in the solar system and is larger than Mercury and would be a planet if it orbited the sun

**UMBRIEL**

TEAM PLANET  
**URANUS**

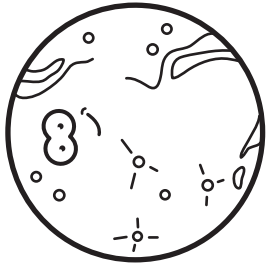

It is the darkest moon of Uranus but has a strange bright ring on the surface, the "florescent cheerio"

**NESO**

TEAM PLANET  
**NEPTUNE**

Very little is known of this moon but its orbit is the most distant from its planet than any other moon

**TITANIA**

TEAM PLANET  
**URANUS**

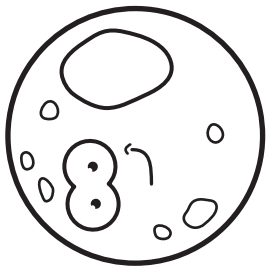

It is the largest moon of Uranus and is made up of ice and rock, with craters and fault lines in its surface

**TRITON**

TEAM PLANET  
**NEPTUNE**

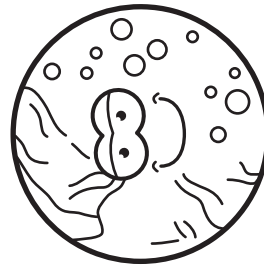

It is Neptune's largest moon and is the only large moon to orbit it's planet in the opposite direction

**MIMAS**

TEAM PLANET  
**SATURN**

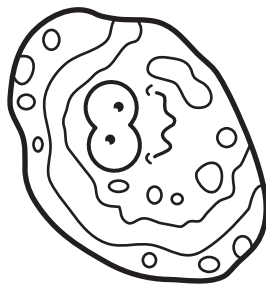

It has a giant crater that makes it look like the Death Star and it appears to be frozen solid

**ENCELADUS**

TEAM PLANET  
**SATURN**

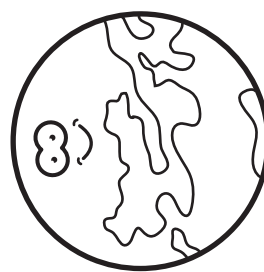

Ice erupts from cracks in its south pole and this material adds to one of Saturn's rings

**HYPERION**

TEAM PLANET  
**SATURN**

Its potato sponge-like surface is still a mystery and it has a very crazy rotation

**TITAN**

TEAM PLANET  
**SATURN**

It is Saturn's largest moon and the only moon that has clouds and a thick atmosphere
