

Orbit and Rotation Race

CHILD -Read the fun facts
-See how many times or how fast you can trace the orbit or rotation paths in ten seconds

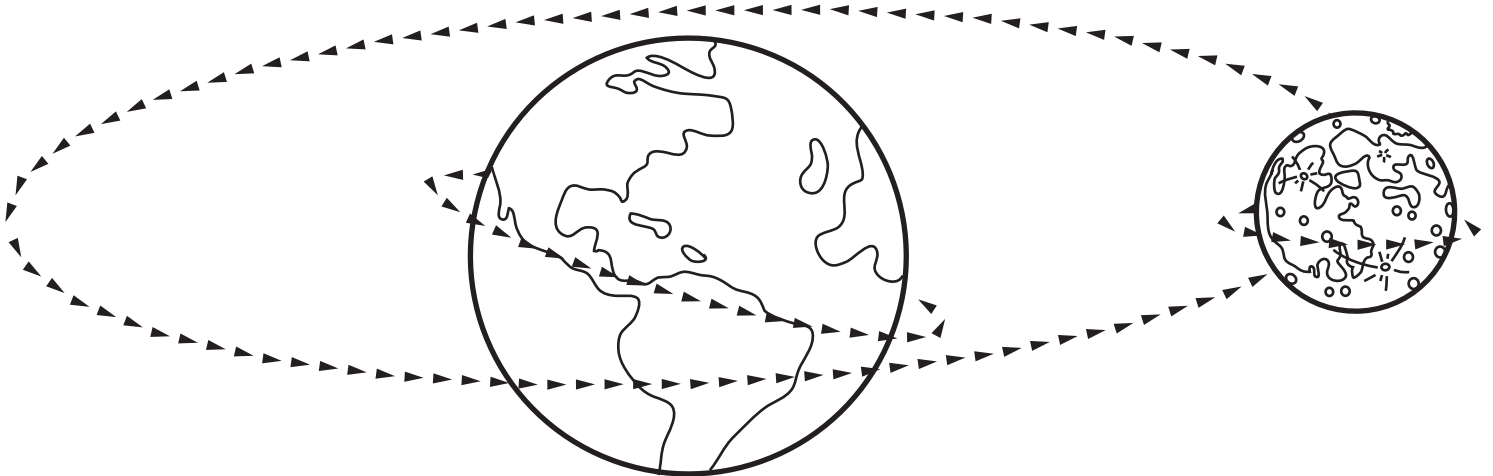

EARTH'S ORBIT:

The orbit of the Earth is the path it takes around the sun and one complete orbit is a year

MOON'S ORBIT AND ROTATION:

The Moon's orbit around the earth and its rotation take the same amount of time, which is why we only see one side of the moon

EARTH'S ROTATION:

The Earth spinning around its center is called its rotation and this causes day and night

EARTH'S SEASONS:

The Earth is tilted as it spins, which is why we have seasons
