

Rainbow Color Clouds

EXPLAIN - Sunlight is made up of many different colors. Rainbows are made in the sky when sunlight shines through raindrops and you can see the colors of sunlight. The colors in the rainbow are always the same.

- CHILD** - With a cotton ball, dip it in red paint and paint the red line in the rainbow. When finished, glue that cotton ball onto the cloud.
- With a new cotton ball, do the same thing for each color.

Red

Orange

Yellow

Green

Blue

Violet
