

# Watch My Plant Grow

## Directions

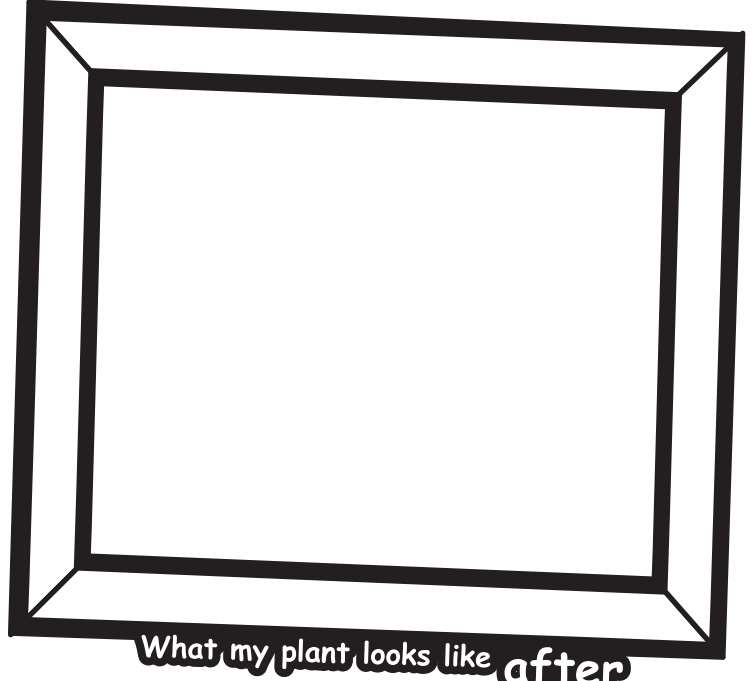

- Give your child a pot and let him fill it with dirt, then plant a seed. Have your child color a picture of how the plant looks. Put the worksheet by the plant so your child can fill it in each day.
- Explain that he will need to help the plant grow by giving it enough water and sunshine. Have your child color the rain drop and sunshine each day as he takes care of his plant. Then each week have your child draw a new picture of what his plant looks like. After four weeks have your child draw a final picture.

## Materials

- Flower Pot
- Soil
- Seeds
